

ORIGINAL ONE-HANDED
BAR CLAMPS

Part of our comprehensive
range of clamping solutions

ORIGINAL ONE-HANDED BAR CLAMPS

Introducing the original **One-Handed Bar Clamp** ideal for a range of woodworking and metalworking applications.

- Average clamping force 150kg
- Quick release trigger enables the clamp to be quickly positioned and released
- The jaw release clip mechanism allows the jaw to be removed and re-attached to the other end of the bar converting the clamp to a spreader
- Toe in feature means that when fully closed the jaws only meet at the top providing an evenly distributed clamping force across the whole depth of the workpiece
- Carbon steel bar and reinforced nylon body for strength and durability
- An ergonomically designed, soft feel piston grip handle fits easily and comfortably into the hand
- Non-marring pads firmly grip and protect the workpiece from damage.

Alternative spreader option

Removable pads

Insert trigger
