

**Parts list:**

- |                            |            |
|----------------------------|------------|
| 1. Adjustable Spray Nozzle | 5. Trigger |
| 2. Pump Handle             | 6. Pump    |
| 3. Spray Bottle            | 7. Lance   |
| 4. Safety Valve            | 8. Strap   |
|                            | 9. Hose    |

**Step:**

1. Attach the nozzle by screwing it on in a clockwise direction.
2. Unscrew the pump handle in an anticlockwise direction.
3. Fill with the desired liquid to the max fill line as shown on bottle.
4. Screw the pump handle back down in a clockwise direction.
5. Pump the sprayer about 25 times.
6. The safety valve will leak if the air pressure is too high. Do not over fill with air or liquid.
7. The sprayer will work when the trigger on the nozzle handle is depressed. To spray continuously, slide the trigger forward into lock position after depressing. To unlock, slide the trigger back.
8. Release pressure from bottle after using by slowly pulling the safety valve a quarter of a turn.
9. Empty the water from bottle after using by unscrew the pump handle and pouring the water out.
